

Chartered Accountants of Canada launch expanded website to support Canadian Standards in Transition

With Canadian accounting and auditing standards undergoing significant changes, Chartered Accountants of Canada is helping members and the wider business community stay on top of latest developments and available resources.

Our *Transition to International Standards* website has been expanded and made easier to navigate. And – it has a new name!

Canadian Standards in Transition is now your gateway to the CA profession's information and learning resources for International Financial Reporting Standards for Publicly Accountable Enterprises, changing standards for Private Enterprises, Not-for-Profit Organizations, Public Sector Entities and International Standards for Auditing.

You will find a full range of resources, education opportunities, support tools and of course the latest developments in changing Canadian Standards.

You can access the website via the CICA homepage or your Provincial Institute/Ordre homepage by clicking the *Canadian Standards in Transition* web button.
